- ✦ Repairs to the stormdrain arch were completed at Market & King Streets. Next week in this area excavation of the trolley tracks begins along with resumption of the electrical ductbank work. Vehicular traffic will proceed down King Street on the east side of the street.
- ✦ The electrical ductbank work on Horlbeck Alley has been completed. Next week, plans to pour the transformer pads in the Market-Horlbeck Parking Lot are being developed. The lot entrance from Horlbeck Alley will continue to be closed. It is possible that traffic flow could temporarily be interrupted and assistance will be rendered.
- ✦ Preparations continue to begin electrical ductbank work on Fulton Lane.
- ✦ Re-lining of the sewer mains will be completed this week with the exception of the line between 145 and 125 King Street. The need for a very complex repair to the line in front of Tellis Pharmacy was discovered this week. It will take most of next week to make the repair. In the meantime, parkers for the Tellis Parking Lot can park in the City of Charleston Queen Street Garage behind the lot. We are sorry for this inconvenience and parking is free in the garage.
- ✦ Next week, re-lining of the lateral sewer services into buildings begins. This work will occur in the daytime and will happen in areas not already impacted by other Streetscape activity. The work will take two months to complete.

*It is important to know that words don't move mountains. Work exacting work moves mountains.*
